Coal Authority Disclosure Project Mine Entry Inspection Report

Site:	Weymouth Drive, Kelvindale
Reference:	4VZ305_Weymouth Drive
Client Service:	Education Services/LES Roads Maintenance
Mine Entry ID and Grid Reference:	Gartnavel No. 5 Pit 255564E 668491N See attached plan
Depth To Rock:	5m - 10m indicated on geological maps although likely <5m.
Predominant Soil Type:	Boulder clay
Mine Entry Historical Information and Provenance:	Coal Authority/British Geological Survey/JWH Ross/GCC DRS offer different positions for the shaft. Shaft shown on Abandonment Plan (JWH Ross). GCC DRS position based on significant results of ground conductivity survey.
Evaluation:	GCC DRS location considered most likely location of shaft
Site Assessment:	No signs of mining related subsidence were apparent at the time of inspection. Shaft most likely located below road/footway.(DRS position) 100m from rear entrance to local primary school. Monthly inspections instructed.
Date Inspected:	28 May 2013
Officer:	T Adams/L McLellan
